

## CUTTING SYSTEM

**500  
SERIES**

Whether you are clearing a site for further development, blazing or maintaining a trail or taming an overgrown fence row Brush Fire has an appetite for clearing the way.

**Dual  
Staggered  
Spirals**

### Rows and Rows of Hungry Teeth

The heart of the Brush Fire system is the design of the rotor. Rows and rows of brush destroying teeth placed in Dual Staggered Spirals. Each tooth is carbide tipped and bolt on replaceable for easy servicing even in the field. The number and placement of these cutting teeth provides uncompromising mulching results of not only brush and trees but grass, vegetation and the occasional stone. Rows of teeth are mounted on staggered spiral 3/4 inch steel blades delivering a fine mulch.

## 500 Series Features

### Hardened Holder

The carbon hardened tooth holders can take what they dish out. Designed to deliver brush destroying power without flinching under fire. These holders combined with the V-Notch Carbide teeth deliver a certain path to destruction for any brush standing in their way. When other holders are giving in, the 500 series push on till the battle is won.

### V-Notch

The immense forces and impacts of mulching try to bend and twist the teeth, ending their tour of duty early. Our V-Notch teeth and Hardened holders won't let that happen. Held firmly in place and able to absorb impacts from multiple directions the V-Notch keeps the teeth chewing up the toughest brush.

### Brush Pusher Bar

The Brush Pusher Bar gives the brush fair warning of what is coming and pushes brush and trees away from the operator.

### Adjustable Skid Shoes

These two position skid shoes allow you to adjust the cutting height for optimal clearing performance.

With direct drive from the engine all the way through the heavy duty gear box to the teeth, the MP560 delivers ultimate cutting power. This could be the greediest Brush Fire to date, when paired with the correct tractor with hydrostatic drive this hungry mulcher is ready to devour brush up to 6 inches in diameter. Its appetite is not satisfied above ground, because of the higher torque you can adjust this monster to mulch below grade. The MP560 is not limited to reverse only, drive forward over your mulch and turn it into dust. Also unique on the PTO Brush Fire is the opening cutting shield, this allows you to adjust for a better high angle of attack on bigger brush or keep it closed and control the mulch for even finer results. Trails and fence lines won't know what hit them.

## Specifications

Model No.	MP560	MP572
Path Width	75"	87"
Rotor Width	60"	72"
Maximum Engine HP	68 HP	120 HP
Minimum Engine HP	45 HP	50 HP
Cutting Depth	1.5" Above to 1" Below Grade	
Number of Cutters	126	160
Slashes Per Second	4620 - 8400	8600-1250
Hitch Type	3-Point Hitch	3-Point Hitch
Hitch Size	CAT II	CAT II
Dive Speed	540	1000
System Protection	Slip Clutch	Slip Clutch
Shipping Size (LxWxH)	80"x 48"x 65"	83"x52"x36"
Unit Weight	2145 LBS.	2500 LBS.
