TORQUE MONITOR™

We're Breaking New
Ground with the All New
TruLink Torque Monitor!

A revolutionary new approach
to collecting installation data associated
with helical pier projects.

TRULINK™ PIN:

Torque is measured at two points within the connection pin located between the anchor drive attachment and the prime mover. The TruLink™ pin simply replaces the OEM pin ensuring that no additional weight or height is added to the installation equipment.

TRULINK

TORQUE MONITOR™

The TruLink™ Torque Monitor system offers true torque readings that deliver a high degree of accuracy (+/- 2%) while providing the operator with real time data. TruLink™ records actual torque being applied to the helical pile, the installation angle and the depth. Unlike other torque monitoring systems available, TruLink isolates torque values only. Downward and side load forces are omitted ensuring the data is clean.
